## 1. Introduction

The following guide explains how GenMix Pro notifies the user when the quantity of a product is lower than the minimum order.

**P.S: This feature only works when both GenMix Pro and GIMS are installed on the same PC.**

## 2. Step-by-Step Process

### a. GIMS configuration

- Enter the Minimum and Maximum order point (*Review Stock Definition section*)

The screenshot shows the 'Product entry' window with the following details:

Description	Code	Min. Order Point	Max. Order Point	Category	Deactivate
BASECOAT WHITE	702	5	20.	PAINT	<input type="checkbox"/>

- Make sure the quantity available in stock is less than the Minimum Order (*Review Reports section*)

Code	Products	Min. Order Point	Max. Order Point	Amount In Liters
702	BASECOAT WHITE	0.0	0.0	2.0

### b. GenMix Pro configuration

- Click on parameters.
- In the left navigation bar, click on GIMS.

- iii. Tick on “Notify me if a product quantity is lower than the minimum order” to activate this feature.

- iv. Close the parameters windows.  
v. Open the Mixing system and search for a formula that contains the code that you configured in GIMS.  
vi. Once you choose a paint line, a popup message appears as below in case the quantity is lower than your stock and the minimum quantity on order.

### 3. Contact information
